2014 State of Maine Ortho Prices

These are prices suitable for budgeting.

The actual price may be up to 30% less if several contiguous towns or counties buy together.

By Town									
<i>These are buy-up prices for budgeting purposes assuming the County buys the base product. If a county buys up to higher than the base product, a town can figure out a further buy-up cost by simply subtracting. For example if Hancock Co. bought up to 6"L2, then Bar Harbor's further buy-up to 3"L1 would be their 3"L1 cost minus their 6"L2 cost, or \$60,500 - \$10,500 = \$54,000. For 3" buy-ups we can further subdivide out urban areas within a large town such as Ellsworth, which may need the urban center at 3"L1 but not the entire town area. This subdividing can only be done on a very limited basis. Additionally, the final price may be reduced by up to 30% if several contiguous towns buy up together to the same product.</i>
